

**MG MASON'S
GUARANTEE**

This product has been manufactured and repackaged in strict conformance with industry and government standards.

This superior combination of B-6, B-12, and Folic Acid helps guard against high homocysteine levels and helps promote cardiovascular health. Homocysteine is a toxic amino acid formed in the body when other amino acids in your blood are broken down by normal body processes. High blood levels of homocysteine have been linked to a higher risk of heart and vessel disease, and are considered perhaps even more of a threat to heart health than is high cholesterol. Scientists believe that deficiencies in vitamins B-6, B-12, and Folic Acid cause homocysteine to build up to unhealthy levels.*

Directions: Adults, one tablet daily as a dietary supplement, preferably with a meal. Adequate folate (folic acid) in healthful diets may reduce a woman's risk of having a child with a brain or spinal cord birth defect.

Keep Out of the Reach of Children.
Store in a dry, controlled room environment.

MASON natural®
